

# High Performance Submersible Pumps

even greater lift

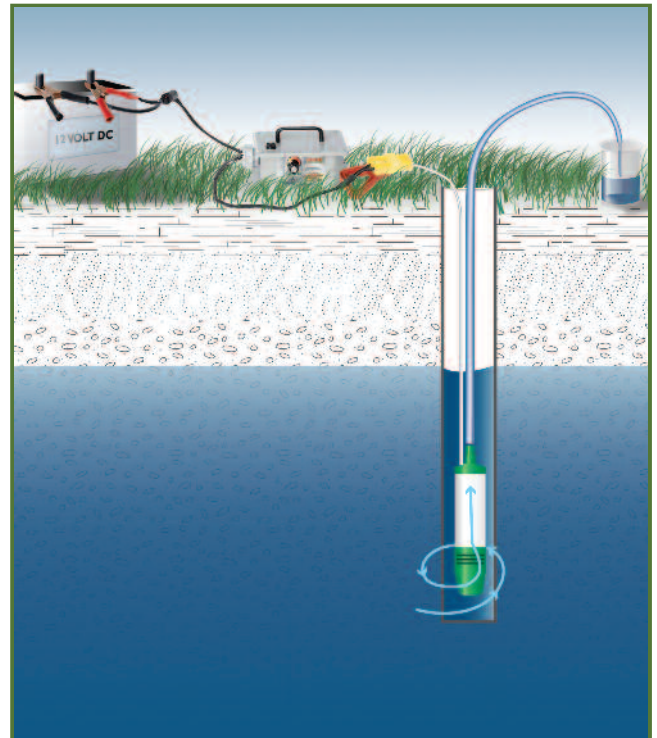

**W**aterra introduces new **High Performance Submersible Pumps** — designed specifically by Proactive™ for well purging and sampling procedures.

All of these pumps can greatly speed up the process of purging and sampling monitoring wells, especially if dedicated installations are used. These pumps are complete and ready to use.

### features

- CAN OPERATE UNDER HARSH CONDITIONS & HIGHER TURBIDITY
- RUNS CONTINUOUSLY IN WATER WITHOUT THE NEED FOR A COOL DOWN
- SLEEK EXTERIOR MINIMIZES WELL HANG-UPS
- RELIABLE DESIGN IS SUITABLE FOR CONTINUOUS SAMPLING & PURGING OF GROUNDWATER WELLS
- VERY RELIABLE & ECONOMICAL
- 400 HOUR MOTOR LIFE

**HIGH PERFORMANCE PUMP IN ACTION**

WSP-19V-2

WSP 24V-3

WSP-12V-3B

WSP-24V-4

WSP-24V-5

WSP-24V-6

### WSP-12V-3B (Super Twister®)

This revolutionary pump is capable of pumping up to **85 feet** from ground level by simply connecting it to a 12 volt battery. With **Constant Voltage Booster Technology (CVBT)** built in, the problem of fuses blowing is eliminated. If your battery should fall below 10.75 volts, the built-in booster will recognize the low voltage and the pump will start pulsating. The CVBT outputs a constant voltage to the pump motors which reduces voltage drop due to battery drainage.

It comes supplied with 90 feet of heavy duty 12 gauge wire and battery clamps.

12VOLT / LENGTH — 17"

### WSP-19V-2 (Mega-Typhoon®)

This pump is capable of pumping up to **80 feet** from ground level by simply connecting the **PA-10600** (Power Booster 1) Controller or the **PA-10650** (Low flow with Power Booster 1) Controller, then connecting the controller's positive and negative alligator clamps to the 12 volt battery.

It comes supplied with 90 feet of heavy duty 12 gauge wire and a yellow connector.

19 VOLT / LENGTH — 12"

### WSP-24V-3 (Tsunami®)

This pump is capable of pumping up to **100 feet** from ground level by simply connecting it to a 12 volt battery. Its reliable design is suitable for continuous sampling and purging of groundwater wells. Use with the **PA-10700** (Power Booster 2) or the **PA-10750** (Low Flow with Power Booster 2) Controllers.

It comes supplied with 110 feet of heavy duty 12 gauge wire and a green connector.

24 VOLT / LENGTH — 17"

### WSP-24V-4 (Monsoon®)

This pump is capable of pumping up to **120 feet** from ground level by simply connecting it to a 12 volt battery. Use with the **PA-10700** (Power Booster 2) or the **PA-10750** (Low Flow with Power Booster 2) Controllers.

It comes supplied with 35 feet of heavy duty 12 gauge wire, a cigarette plug and battery clamps.

24 VOLT / LENGTH — 20"

### WSP-24V-5 (Hurricane®)

This pump is capable of pumping up to **150 feet** from ground level by simply connecting it to a 12 volt battery. Use with the **PA-10700** (Power Booster 2) or the **PA-10750** (Low Flow with Power Booster 2) Controllers.

It comes supplied with 160 feet of heavy duty 10 gauge wire and a green connector and mounted on a high impact plastic reel.

24 VOLT / LENGTH — 26"

### WSP-24V-6 (Mega-Monsoon®)

This pump is capable of pumping up to **200 feet** from ground level by simply connecting it to a 12 volt battery. Use with the **PA-10850** (Low Flow with Power Booster 3) Controller.

It comes supplied with 210 feet of heavy duty 10 gauge wire and a blue connector and is mounted on a high impact plastic reel.

24 VOLT / LENGTH — 26"
